Retail Price List

VEGETABLE SEED

F. F. Smith & Co., Inc.

SACRAMENTO, CALIFORNIA

F. F. SMITH & CO., INC.

Sacramento, California

Main 618

We submit herewith price list of Vegetable Seeds, together with brief descriptions of the varieties listed. We only list such varieties as are commonly planted in the interior valleys of California. All these items have been proven suitable to our climatic conditions and are satisfactory for the market or home garden. We carry in stock many types and varieties of Vegetable Seeds other than those listed and we will be pleased to receive your inquiries on any you may require.

An average ripening period for each type or variety has been given but this will not be correct in every case as moisture and climatic conditions will hasten or retard the maturity of a crop. The variations in time of ripening between the early and late types of any given variety will, however, be nearly correct.

If you are living close to Sacramento we can supply you with seeds from either of our local stores. Seed dealers in other towns and cities of the Sacramento and San Joaquin Valleys carry in stock or can secure our seeds. Patronize your local merchant when possible; you will save time and you help support a local institution.

We will prepay postal or express charges on all lots of seed up to 10 pounds to all points within the 3rd Postal Zone of Sacramento, which is a radius of 300 miles. In mailing seed orders in California be sure to add the state sales tax to the amount of your remittance.

Seed stocks are fairly short this season. We have ample supplies at this time but with a brisk Spring demand expect to sell out early on many items. Prices quoted are therefore subject to change and stocks being unsold.

We use every care possible in the growing or selection of seed which we sell. Conditions of weather and soil, which adversely affects the germination of seeds are beyond our control and we can therefore give no warranty express or implied as to description, quality, productiveness or any other matter of seeds, plants or bulbs we sent and will be in no way responsible for the crop.

BEANS

Dwarf Green Podded

BOUNTIFUL

Pods straight, broad flat, light green, 8 inches long; stringless. Season 51 days; very productive.

10 lbs.	1 lb.
\$.20	\$.35
